

hi!

I'm Cindy! I was blown away by the level of care I received at the SASPCN Maternity Clinic with my third pregnancy! I loved that I actually got to build a relationship with staff and with Dr. Jacobs, who later delivered my baby.

All about Cindy...

Age: 36

Referring Doc: Dr. Ajayi

Maternity Docs: Dr. Jacobs

Programs: Maternity

Clinicians: Christine Toner & Reid Rufiange

Patient Success Story

What led you to the SASPCN Maternity Clinic?

For my first two low-risk pregnancies, I sought maternity care at a larger, more specialized clinic. Physicians were rushed and busy, and I didn't really feel like I received personalized care. My appointments were sometimes a seven hour wait! I had friends that had raved about their maternity care through the SASPCN—this got me excited to explore my care options with my third baby!

What was the best part of the Maternity Clinic for you?

All of the staff were SO friendly and welcoming, and by my second visit, Reid knew me by name! The doctors were all compassionate and knowledgeable, but maintained their own styles and perspectives. I felt valued and never waited more than 10 minutes for an appointment. I genuinely looked forward to my appointments because it felt like having a conversation with friends; I actually felt like a person and not just a medical chart. Delivering at the Sturgeon Community Hospital had a laid back, happy vibe that was also refreshing.

What would you say to women who are seeking maternity care?

Don't think twice. You will have an awesome experience at the SASPCN Clinic!

The SASPCN Maternity Clinic provides prenatal and delivery services to low-risk pregnancies. Your maternity care is our team's top priority!
